

# Maersk Ngujima-Yin

## PROJECT DETAILS:

Location:	Vincent Field, North Western Australia
Contract Value:	Confidential
Contract Period:	May 2010 - Current
Safety Statistics:	Manhours: 582,506 LTIFR: 0 (As at October 2011)

## CLIENT: Maersk Australia Pty Ltd

### Scope of Work:

Clough AMEC is currently providing a variety of engineering and maintenance services to Maersk's FPSO, Ngujima-Yin, which is located on the Vincent oil field (owned by the North West Shelf Joint Ventures). The scope of the work includes Engineering, Fabrication, Offshore installation and Maintenance Services.

The work involves three separate scopes:

- The provision of offshore personnel to provide routine maintenance services. This is a two year contract with options in place to extend the contract.
- The second scope is associated with the replacement of a compression module.
- The third scope of work includes process and technical evaluations and rectification along with an integrity and maintenance review.

In summary, services include:

- Project management
- Engineering studies and detailed design of Brownfield modifications
- Production optimisation and performance improvements
- Maintenance support
- Provision of offshore personnel
- Procurement and fabrication
- Assistance to commissioning
- Logistical support
